## **Infiltration Basin**

Property owners, Homeowners Associations, business owners, and residents responsible for maintenance of a detention basin must submit the following form annually by December 31 to the Engineering Department (one form per basin). Please fill out carefully and hit submit when completed. You may upload photos and files to this form. You cannot save this form and return to it. Please call us if you have questions.

Looking for a stormwater facility form for a facility type other than an infiltration basin?
GO TO OUR **STORMWATER BMP FORMS** MASTER PAGE TO SELECT FROM A LIST OF SYSTEM TYPES.

Stormwater Mgt. Measure Inspection Checklist
Inspection Checklist Instructions: Check off any conditions for the stormwater measure(s) you
have. Any checkmarks require preventative and/or corrective maintenance. See forms on NJDEP
website for suggested actions. This list represents general requirements.
Pretreatment (Forebay)
☐ Scouring or erosion present at inflow point
$\square$ Clogged pipes or excessive sediment in forebay
$\square$ Damaged outlet structure (e.g.,cracking, subsidence, spalling, erosion, or deterioration)
$\square$ MTD inspection, if applicable (follow manufacturer instructions)
Bottom of System
Drain time in approx. hours

	More than 72 hours may need corrective action.  Excessive sediment, silt, or trash accumulation  Erosion or channelization is present  Animal burrows/rodents are present  Uneven bed  Evidence of sinkholes or subsidence
	Vegetation  Large spot(s) showing bare soil  Overgrown Vegetation  Tree growth in basin
	Basin Embankment and Side Slopes Erosion, soil slide or bulges, seeps and wet spots, loss of vegetation, or erosion on the basin slope
	Outlet  Trash or debris accumulation more than 20%  Trash rack is damaged or rusted greater than 50%; Trash rack is bent, loose, or missing parts  Outlet components (e.g., orifice plates or weir plate) skewed, misaligned, or missing  Discharge pipe apron is eroded or scoured  Standing water is present in the outlet structure longer than 72 hours
	Emergency Spillway  Trees or excessive vegetation present  Damaged structure
	Miscellaneous  ☐ Fence: broken or eroded parts  ☐ Gate: missing gate or lock  ☐ Sign/plate: tiled, missing, or faded  ☐ Excessive or overgrown vegetation blocking access to the basin
